Forecast for Sunday 27 Jun 2021

Weather: Widespread low cloud across the area at first but some cloud breaks in the west to the lee of high ground allowing some sunny spells. Sunshine becoming more widespread on Sunday morning after the clearance of any mist or fog, but remaining cloudier in the east, perhaps with a little drizzle. Low cloud in the east tending to lift but spread further west during the day, with a continuing risk of the odd light shower. Dry with some clear spells across the park through the evening, however fog patches and low cloud reforming overnight.

Chance of cloud free mountain/hill tops above 600m: 60% becoming 90% in the west, 30% becoming 80% in the east.

Visibility: Occasionally moderate or poor to start with areas of cloud down to 300-400m, but improving good or very good as cloud lifts during the day. Poor in any fog in the west at first, otherwise mainly good becoming very good.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Very poor visibility across the majority of the park during the morning, best of any breaks towards the west. High UV levels likely in any more prolonged cloud breaks, so adequate protection recommended.

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Sun 27 Jun 2021	0mm	9.6mm	11.8mm

Forecast for Monday 28 Jun 2021

Weather: Increasingly cloudy through the early hours, especially in the east, with areas of mist and low cloud developing. Cloud expected to thicken more generally on Monday with some patchy rain likely to push up from the south.

Maximum wind: E or NE 10-15 gust 20mph.

Chance of cloud free mountain/hill tops above 600m: 40% becoming 70%.

Visibility: Good, occasionally moderate or poor in mist and outbreaks of rain, with areas of cloud 300-400m lifting 600-700m during the day.

Temperature: **Valleys:** 10C becoming 18 C
At 600m: 6C becoming 12 C
Freezing level: Above the summits.
